

HCF RESEARCH FOUNDATION CALL FOR EXPRESSIONS OF INTEREST

HEALTH SERVICES RESEARCH GRANTS 2024

For 23 years, the HCF Research Foundation has been driving innovation across health services research in collaboration with researchers and clinicians. Through our foundation, we've invested almost \$30 million to help deliver better healthcare outcomes for all Australians and ensure they can access the right treatment, at the right time, in the right setting.

Our 2024 annual call for research projects will deliver funding to the research community from 1 January 2025. For this year's grants, we're inviting applications addressing one of the following three themes.

We invite you to apply if your health services research project explores:

1. Co-design approaches to develop and evaluate innovative solutions and models of care that optimise the existing healthcare workforce capacity to improve patient outcomes and experience.
2. Strategies for the identification and remediation of bias in healthcare provision.
3. Addressing the challenges of implementing and sustaining viability of new alternatives to hospital care.

Applications will be assessed on scientific merit and their ability to drive meaningful change to health services.

We welcome applications that demonstrate strong potential and a considered approach for translation of research outcomes into practice.

The closing date for expressions of interest is 6 May 2024 (5pm AEST).
