

# HCF RESEARCH FOUNDATION CALL FOR APPLICATIONS

## HEALTH SERVICES RESEARCH GRANTS 2022

**Celebrating 21 years of contributions to healthcare research, the HCF Research Foundation was established to drive research, enquiry and innovation in the delivery of healthcare for the benefit of all Australians.**

Through the work of the HCF Research Foundation, we continue to drive positive change to deliver better health outcomes and access to affordable, high-quality healthcare when and where it's needed.

Our 12th annual call for health services research projects will deliver funding to the research community from **1 January 2023**.

For this year's call, we're looking for applicants whose research addresses one of the following two areas of interest. We invite you to apply if your health services research project addresses:

### 1. WOMEN'S HEALTH

- Sexual and reproductive health
- Preventative health/managing comorbidities, or
- Addressing variations in healthcare.

### 2. MENTAL HEALTH

- Prevention and early intervention
- Emerging treatment and rehabilitation models, or
- Improving access and outcomes for regional and remote communities.

Applications will be assessed on scientific merit and their ability to drive meaningful change to health services.

We welcome applications that demonstrate strong potential and a considered approach for translation of research outcomes into practice.

The closing date for applications is 5pm on **Friday 13 May 2022 (AEST)**.
