Private health insurance rebate amounts listed are effective from 1 April 2021 to 31 March 2022, and are based on the Rebate Adjustment Factor formula which takes into account growth in the Consumer Price Index and the industry weighted average premium increase.

If you nominate a tier that results in a lower rebate than your income entitles you to, you will receive a tax offset through your tax return at the end of the financial year. If you nominate a tier that results in a higher rebate than your income entitles you to, you will incur a tax liability through your tax return at the end of the financial year.

***Note:** Single parents and couples (including de facto couples) are subject to the family tiers. For families with children, the thresholds are increased by \$1,500 for each child after the first.
