

WHO IS ELIGIBLE FOR MEDICOVER

Medicover is available to specialist doctors working in Private Practice who provide services to eligible HCF members in HCF Participating Hospitals. It is not available to Pathologists, Radiologists or Doctors employed fully or partially by a publicly funded facility.

HCF's definition of private practice

A Recognised Provider operating on an independent and self-supporting basis either as a sole, partnership or group private practice but not employed or engaged by or subsidised by the Commonwealth or a State or Territory Government for the provision of accommodation, facilities or other services.

For the avoidance of doubt, this does not include medical practitioners employed by or contracted to a public hospital or any other type of publicly funded facility even where they are undertaking the services as part of private practice arrangements.

HCF participating hospitals for the purposes of HCF Medicover

Is a hospital with which HCF has established a contract for the provision of Hospital Treatment for HCF Members or any public hospital designated by HCF as an HCF Participating Hospital from time to time.
